PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building scalable, high-traffic enterprise web applications with React.js, Next.js and JavaScript, backed by hands-on Laravel/PHP. Delivered global B2B eCommerce features — product listing pages, category pages, search, filtering, sorting, pagination and analytics dashboards — on a platform serving a catalog of ~4.6 million products. Strong on performance optimization, SEO, REST API integration and production debugging, with a track record of shipping reliably in Agile teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js (Pages Router & App Router), JavaScript (ES6+), HTML5, CSS3, Bootstrap, jQuery

State Management: Redux Toolkit, Context API

Forms & Data Viz: Formik, amCharts

Backend & APIs: PHP, Laravel, REST APIs, Axios, MySQL

Authentication: JWT, Laravel Sanctum, Session-based auth

Performance & SEO: Lazy loading, dynamic imports, image optimization, on-page SEO

Tools & Workflow: Git, GitHub, Jira, Postman, npm, Agile / code reviews

PROFESSIONAL EXPERIENCE

Software Engineer | NextGen Esolutions Pvt. Ltd. 2023 – Present

- Engineered enterprise B2B web applications end to end using React.js, Next.js, JavaScript and Laravel, working across both the Pages Router and App Router in production.
- Built product listing pages (PLP), category pages and search with filtering, sorting and pagination for a catalog of ~4.6 million products, improving product discoverability and browsing speed.
- Developed reusable, componentized React UI and integrated REST APIs with Axios, reducing duplicate code and speeding up feature delivery.
- Implemented complex, validated forms with Formik and managed application state with Redux Toolkit and Context API.
- Created interactive analytics dashboards using amCharts to surface key business metrics for stakeholders.
- Improved application performance and Core Web Vitals through lazy loading, dynamic imports, image optimization and SEO enhancements.
- Implemented JWT, Laravel Sanctum and session-based authentication flows to secure user and admin access.
- Collaborated in a 5-member Agile team using Jira, Git, pull requests and code reviews; resolved production issues and ensured responsive, cross-browser compatibility.

Frontend Developer | NextGen Esolutions Pvt. Ltd. 2021 – 2023

- Migrated legacy jQuery modules to modern, maintainable React components, improving code quality and UI consistency.
- Integrated Laravel REST APIs and delivered responsive user interfaces across devices.

- Supported production releases and resolved bugs to keep applications stable.

PHP Developer | Startup CA2020 – 2021

- Built PHP/Laravel web applications and CMS solutions from requirements to delivery.
- Managed deployments, hosting and MySQL database integration.

KEY PROJECTS

- Raptor Supplies — Contributed to a global B2B eCommerce platform with a catalog of ~4.6 million products. Built PLP, category pages, search, filters, pagination, dashboards and REST API integrations using React.js, Next.js, Formik, Axios and amCharts.
- Aadishakti Travels — Developed booking workflows and dynamic modules using Laravel, PHP and Bootstrap.
- South North Travels — Implemented CMS features, enquiry forms, SEO improvements and performance optimization.
- Tarun Art Gallery — Maintained and optimized the business website and content management.
